Projects

Menu Check App	React, Flexbox, Styled Components 2021
-----------------------	---

In Progress
<https://menu-check-maxklein1992.vercel.app/>

Energy App Ass. React, Flexbox, Styled Components 2021

I made an assignment for an Energy application where the total energy usage should be calculated and displayed in the app.

<https://energyapp-maxklein1992.vercel.app/>

Parcel Assignment React, Flexbox 2021

I made an assignment for a Parcel application where every parcel item should be relocated to the list of the correct department. The appropriate department can sign the parcel which will remove it from the list.

To Do App React 2021

I created a simple To Do App where the user can add, highlight and delete To Do items. The To Do Items that are added are shown in a list.

<https://todoapp-b4mp7iwxv-maxklein1992.vercel.app/>

Portfolio page React, Material UI, Flexbox 2021

This website I created in React to show my development work that I have done so far. You can find my resume and there is a possibility to contact me.

Maffia GO C#, Firebase, Unity, REST 2019 - 2020

A smartphone app that combines gaming with the real world. The game uses location tracking and mapping technology to create an 'augmented reality' where players have to capture and defence mafia buildings in real locations. Unity 3D engine is used to create the game. Google Firebase Real-time Database is a cloud-hosted NoSQL database that has been used to store and sync between our users in real-time.

Work experience

Evision (Wolters Kluwer) - Implementation Consultant – 03/2020 – Present

- First a year as a C# trainee from Young Capital. After that as internal employer.
- Understanding and analyzing functional requirements.
- Creating features and customer solutions by configuring and/or programming according to the functional and technical design. The main part of the configuring and programming is in XML. Automatic tests are in C#. Some part of the functional updates are in React (for example creating a Risk Matrix or creating buttons).
- Contributes to the analysis of incidents and structural defects/bugs in the solution.
- Testing implemented features.

Young Capital Next – C# Trainee – 08/2019 – 03/2021

- The C# Traineeship starts with an eight week bootcamp where the trainee will be trained to become a certified Junior .NET C# developer. After the bootcamp, the trainee continues his further career at one of the clients, which was for me Evision (Wolters Kluwer).

ABN AMRO – IT Business Analyst – 05/2017– 08/2019

- I started as a IT Business Analyst Trainee from Young Colfield. After that I became internal employer.
- I worked for Accounting, Investment (Web) and Mobile Banking (App) scrum teams.
- Discussing functional requirements with stakeholders.
- Discussing design with stakeholders and Designer.
- Creating user stories for new functionalities. And discussing user stories with development team.
- Discussing and presenting legal impacts for specific new features with legal representatives.
- Rollout marketing plan together with marketing department for specific new features which have a huge impact on the client.
- Collaborating with call center for specific features where huge client calls are expected.
- Collaborating between web and mobile IT scrum teams for new functionalities.
- Documenting new functionalities and other updates in IT processes.
- I have also visited part of our Investments IT Team in Hyderabad (India) as a work trip.

Young Colfield – IT Business Analyst Traineeship – 05/2017– 05/2018

- 1 year Traineeship that is focused on personal development and coaching.

Flinqer – Startup employee – 08/2015 – 05/2016

- First as an Intern and after that as an internal part-time employee I have helped by starting up a new Supply Chain Finance platform. I worked here part-time, since I was still studying.
